Chemicals – Each product has an each price and a single case price. All products sold in increments of “1” are net priced. There are a few fast moving items that we only sell by the case and these are marked with an asterisk to the left of the part number.

Oils – Oil pricing changes as our cost on oil changes. Jobber price is listed as a reference. Your discount needs to be applied to the jobber price to figure your cost.

- Warranty is included in the net pricing on all products and are non-returnable.
- Some products are not available in all warehouse locations. See index for more information.
- Prices subject to change without notice. The pricing for oil products will change as our cost from our suppliers changes.
- Not responsible for typographical errors.
