Spill-Free Funnel

\$29⁹⁹

#24680

The Spill-Free Funnel has been improved by adding an extra 45-degree elbow, a 5" extension, and a new E adapter. The E adapter is used on the surge tanks on many Ford applications. 45-degree elbow allows use on radiator caps that are placed at an angle. Extension allows access to caps located under shrouds or in fender wells.

The Spill-Free Funnel eliminates trapped air pockets which usually cause erratic cooling system and heater performance. It controls the proper amount of coolant entering the system and enables unattended filling of the cooling system. The funnel eliminates squeaky belts caused by coolant overflow and protects the environment. Five adapters fit most domestic and import cars, light trucks and Ford vehicles.
