**NEW PRODUCT UPDATE FROM DORMAN**

**Nissan Electronic Steering Column Lock Actuator - Available from Auto Plus!**

Dorman Products has recently designed an OE Fix solution to the Nissan steering column lock failure problem. Several Nissan vehicles, including the popular Altima and Maxima, suffer from an extremely high rate of steering column lock actuator failures. The original unit typically fails due to worn gear teeth, which eventually leads to a locked steering wheel and the inability to start the vehicle.

Dorman's OE Fix replacement part features:

- A stronger compound gear material for added durability
- Updated software to adjust gear speed minimizing gear teeth wear
- Exclusive smart remote programming tool included to eliminate a costly trip to the dealer

Receive a YETI tumbler when you install Gates hoses. See flyer or website for complete details.  
Sept 1-Nov 30, 2016

Why is a focus on complete cooling system repairs so important? Here's some food for thought...

**PROBLEM:**

Radiator and water pump replacement spikes around 9 years. Radiator hose failure spikes around 11 years. Providing a customer with a brand new water pump or radiator, but not new radiator hoses is like setting a ticking time bomb for a comeback. Surprisingly, repair records show that 90% of the time, the old hoses are put back on with the new radiator or water pump.

**SOLUTION:**

Avoid customer comebacks by replacing all worn system components with every cooling system repair.
