COIL-ON-PLUGS

STANDARD
Engine Performance Specialists

What makes Standard® Ignition Coil-on-Plugs the best:

- Standard® Coil-on-Plug assemblies are manufactured from the finest components for optimum performance and a long service life under all operating conditions
- Neodymium in the core creates the strongest magnetic field and produces max high voltage output at all speeds
- High dielectric epoxy is injected into the case and pulled into a vacuum to eliminate air pockets and prevent moisture intrusion or thermal breakdown
- Standard's reinforced bobbins prevent voltage flash-over for an extended service life.

TechSmart® Electronic Throttle Bodies

The Problem: Electronic throttle bodies have high failure rates. When the original fails, it can affect a vehicle's power, fuel economy, and drivability.

Our Response: Meeting the demand for high-quality replacements, TechSmart's line of Electronic Throttle Bodies includes more than 130 direct-replacement units and covers more than 65 million VIO. To ensure quality and reliability, each unit is 100% new, never remanufactured. Plus, with our units, you won't encounter comebacks due to worn items in a partial rebuild.

100% NEW NOT REMAN

Undergoes extensive testing to ensure quality and reliability out of the box

New, never remanufactured, which maximizes performance and extends service life

TechSmart® Tip: Certain units require a factory relearn procedure, so remember to follow the OE service manual when performing the replacement.

Superior Testing, Extensive Coverage

TechSmart's Electronic Throttle Bodies undergo extensive in-house testing at SMP's engineering department in Long Island City, NY. There, our engineers look at flow tests and make sure each unit meets our high performance standards. The result is a high-quality replacement with coverage for an array of domestic and import vehicles, including but not limited to Audi/VW, BMW, Ford, Toyota, and GM.
